## CutePDF™ Writer

**Create PDF documents on the fly — for Free!**

Portable Document Format (PDF) is the de facto standard for the secure and reliable distribution and exchange of electronic documents and forms around the world. CutePDF Writer (formerly CutePDF Printer) is the free version of commercial PDF creation software. CutePDF Writer installs itself as a "printer subsystem". This enables virtually any Windows applications (must be able to print) to create professional quality PDF documents - with just a push of a button!

FREE for personal and commercial use! No watermarks! No Popup Web Ads!

**Have specific and advanced needs above and beyond that of other users?**

[Custom Redistribution](#) now available!

**Installation Requirements**

- Supports Microsoft Windows 98/ME/2000/XP/2003.
- Requires PS2PDF converter such as Ghostscript (recommended). You can get the free GNU Ghostscript 7.06 [here](#).

► GNU Ghostscript is an open-source interpreter for the PostScript language and the PDF file format. It is distributed under the [GNU General Public License](#). You may obtain the source code for GNU Ghostscript [here](#).

**What's New**

- Title of the software changed for less confusion.
- Destination folder moved into system %Program Files%.
- Supports foreign language Windows better.
- Seamlessly integrate with coming CutePDF 3.0.
- No longer include Ghostscript. You may download and install it separately.
- V2.1 detects the installation of Ghostscript on your system. So, you can always install the [latest version of Ghostscript](#) to get better PDF with ease.
- To use with other PS2PDF application, please refer to [FAQs](#).

*Creating a PDF with this free software couldn't be easier. All Power has to do is select Print from any application, choose CutePDF Printer, and the software saves his new PDF to his hard drive. Best of all, despite being freeware, the software doesn't include any annoying ads or marring watermarks.*
